No. of Printed Pages : 02

SARDAR PATEL UNIVERSITY
M. Sc. (IT integrated) EXAMINATION, IX SEM

Date : 20th Nov 2019, Wednesday

Time : 10:00am To 01:00pm

Session : Morning

Sub: Data Warehousing and Data Mining

Course No : PS09CIIT02

Total marks : 70

Q – 1 Select an appropriate option MCQ

[08]

- i) Which one manages both current and historic transactions?
a) OLTP b) OLAP c) Spread Sheet d) All of above
- ii) The data warehouse is _____.
a) read only. b) Write only c) Read Write only d) Text mining
- iii) In _____ the group are not predefined.
a) Association rules b) Summarization. c) Clustering d) Prediction
- iv) Treating incorrect or missing data is called as _____.
a) selection. b) preprocessing. c) transformation. d) interpretation.
- v) After the pruning of a priori algorithm, _____ will remain.
a) Only Candidate Set. b) No Candidate Set
c) Only Border Set d) No Border Set
- vi) The non – root node of item – prefix – tree consists of _____ fields.
a) Two b) Three. c) Four. d) Five
- vii) The sigmoid function also known as _____ functions.
a) Regression. b) Logistic. c) Probability d) Neural
- viii) Each neuron is made up of a number of nerve fibres called _____.
a) electrons. b) molecules. c) atoms. d) dendrites.

Q – 2 Answer the following Questions (ANY SEVEN)

[14]

- i) Write difference between Data Warehouse and Data Mart
- ii) Explain advanced visualization technique in data warehousing.
- iii) Why meta data is important in a data warehousing?
- iv) Explain cluster analysis
- v) Write major task in data processing
- vi) Write about market basket analysis
- vii) Explain improving the efficiency of Apriori.
- viii) What do you mean by Classification
- ix) Write classification by Back propagation

Q – 3 a) How Data ware house become mainstream? Explain with figure [06]
b) Explain STAR Schema. [06]

OR

Q – 3 b) Define OLAP and explain guideline of it. [06]

Q – 4 a) Explain Data Reduction technique [06]

b) Explain major issues in Data Mining. [06]

OR

Q – 4 b) Discuss Data integration [06]

Q – 5 a) Write Mining closed and Max patterns. [06]

b) Explain improving the efficiency of Apriori [06]

OR

(1)

(P.T.O.)

- Q – 5 b) Explain data cube – based mining of quantitative associations [06]
- Q – 6 a) Write about attribute selection measures [06]
 b) Discuss Backpropagation. [06]
- OR
- Q – 6 b) Explain Bayes Classification methods [06]
